Ashish Kumar

Data Scientist NLP | AI | ML

Bengaluru

(+91) 8123067044 | ashish.tulip12@gmail.com | ashishtulip | ashishtulip

About Me

Expert in Data Science, Natural Language and Artificial Intelligence with over six years of professional experience, strong theoretical and quantitaive backgrounds, and a knack for finding and implementing innovative solutions to complex problems.

Professional Experience

Greet Labs Pvt Ltd.

Senior Data Scientist — *Jan. 2026 - Present*

- Delivered recommendations on use and development of generative AI and large language models.
- Described strengths and limitations in data sources and models and estimated project timelines.
- Drafted plans to implement/monitor human-in-the-loop AI labeling and offer multi-tier API access.

Greet Labs Pvt Ltd.

Data Scientist — *2025-2026*

- Refactored, optimized, and implemented best practices for large lanaguage models
- Enabled multigunal training and converted pipelines from Airflow to Sagemaker Pipelines
- Proposed and built information quality model to supercharge ML and generative AI
- Created internal packaging for external data collection, data visualization, and sampling
- Owned, improved, and expanded (to non-English) featured NLP models-sentiment & toxic speech
- Automated model reports on inputs, parameters, and metrics (precison, recall, f1, accuracy)
- Used SQL and Athena to efficiently query customer data in DynamoDB, Athena, and Redshift
- Frequently wworked with datalakes, Apache Arrow columnar format, and unstructured JSON data
- Mentored junior team members and often contributed tutorials and other documentation
- Delivered public- and client- facing thematic analysis of workplace collaboration messages
- Created labeling rule books, documented edge cases, and trained third party annotators

Greet Labs Pvt ltd.

Senior Data Analysts — *2024 - 2025*

- Developed data-driven insights to identity oppurtunities to improve the product
- Developed customer-facing metrics and dashboards
- Developed and reviewed open-source data science tools, including popular bot detection software
- Developed advanced predictive models leveraging social media data networks to analyze user behavior and trends

Greet Labs Pvt Ltd.

Data Analyst — *2022 - 2024*

- Delivered feedback on research projects
- Led data science working groups on python, machine learning, and natural language processing
- Contributed to project automating personalized analytics for Product Managers
- Created rtweet, a massively popular R package for collecting and analyzing Twitter data

Besant Technologies

Instructor — *2021-2022*

- Instructor of record for quantitative methods, public speaking, leadership, and persuasion
- Updated and refined course materials for Data Science method course

Tools

Languages	Python | SQL | Git | Docker | Bash | Javascript
AWS Resources	S3 | Sagemaker | ECR | Athena | Redshift | DynamoDB
Web Data Collection	REST/Stream APIs | requests | BS4
Dev-Ops	Azure | Jira | GitHub
Deep Learning	PyTorch | TensorFlow | HuggingFace | Keras
Machine Learning	Scikit-learn | XGBoost | FastText | TidyModels
Natural Language	Spacy | NLTK | RegEx
Data Science	Polars | Pandas | Numpy | Tidyverse | Data.table
Data Visualization	Ggplot2 | Ggvis | Ploty | Matplotlib | D3
Reporting	JupyterNB | Markdown | LaTeX

Skills

Theory	Communication | Media | Topic Mining
Resarch Methods	Experiments | Survey | Sampling
Artificial Intelligence	LLMs | Transformers | Human in the Loop | Reinforcement
Supervised Learning	Linear Models | Multilevel | Time Series | ANOVA | Structural Equation
Unsupervised Learning	Topic Modeling | Network Analysis | PCA | Factor Analysis | Similarity
Leadership	Project Management | Team Supervisors

Education

A.M.C Enginerring College, Bangalore
Master of Computer Application *July 2017 - Dec 2020*

- CGPA : 6.71/10

A.M.C Enginerring College, Bangalore
Bachelor of Computer Applications *July 2013 - May 2017*

- Class : Second

Publications (Selected)

Open-Source Software
- textfeatures: Extracts features from text
- rtweet: Collecting Twitter data
- Low-code/no-code python library that transforms plain English instructions into fully configured multi-agent AI teams
